Auraria Campus to hold Covid-19 vaccination clinics Friday and Monday

Emails inviting employees to schedule their vaccinations on-campus will be sent from PrimaryBio today.

The Health Center at Auraria received 1,300 doses of the two-shot Moderna and Pfizer Covid-19 vaccines requested from the state for the week of March 29. Half of these will be administered on Friday, April 2 and the remaining portion will be administered on Monday, April 5. Both clinics will take place from 8 a.m. – 5 p.m. All Auraria Campus employees, including student-employees, qualify for this phase.

Important info:

- Emails inviting employees to schedule their vaccinations will automatically be sent from PrimaryBio today between 3-5 p.m. to all employees using the campus email database. As this event will administer the two-shot Moderna and Pfizer vaccines, qualifying Auraria campus constituents will be required to schedule both their first and second shots.
- The type of vaccine provided will be dependent upon the time you schedule and vaccine availability.
- Those who qualify and receive an email invitation are encouraged to schedule their appointment by Wednesday at noon.
- Vaccinations will occur at the drive-thru location established in the 5th Street Garage (650 Walnut St, Denver, CO 80204).

If you receive an invitation and cannot schedule an appointment for Friday or Monday, there will be additional vaccination opportunities in the future. We will promptly share more details with the campus community as they become available.
